

MedhaOne ERP

One-page repo summary

Ports in repo: web 1729 | api 1730 | rbac 1740

What It Is

Multi-tenant ERP monorepo for AnalytixKraft / MedhaOne. Repo evidence shows a Next.js web app, a FastAPI ERP API, and a separate Express RBAC API backed by PostgreSQL.

Who It's For

Primary persona: Not found in repo. Repo modules point to org admins plus inventory, purchase, sales, and operations users working inside tenant workspaces.

What It Does

- Tenant-aware auth and isolated organization workspaces
- RBAC and super-admin control plane for organizations and users
- Masters for parties, products, warehouses, brands, categories, and tax rates
- Inventory flows for opening stock, stock adjustment, stock correction, and availability
- Purchase workflows for POs, GRNs, purchase bills, and credit notes
- Sales orders, reservations, and dispatch notes
- Operational, masters, and data-quality reports plus audit trail/history

How It Works

Browser -> Next.js web app (port 1729). The app redirects '/' to '/dashboard' and exposes '/app/api/*' handlers that proxy browser requests server-side. ERP path: web handlers forward authenticated requests to the FastAPI service at port 1730. Login writes a 'medhaone_token' cookie used by later proxy calls. RBAC path: '/api/rbac/*' proxies to the Express RBAC API at port 1740. ERP data: tenant routes cover dashboard, masters, inventory, purchase, purchase bills, sales, reports, settings, tax rates, and users. Storage: ERP tenant data lives in PostgreSQL schemas named 'org_<slug>'; the inventory ledger is immutable and updates StockSummary. RBAC keeps a public org registry/audit trail plus org-local users and audit logs.

How To Run

1. `cp .env.example .env`
2. `cp apps/api/.env.example apps/api/.env`
3. `cp apps/web/.env.example apps/web/.env.local`
4. `pnpm install`
5. `cd apps/api && python -m venv .venv && source .venv/bin/activate && pip install -e .`
6. `cd /Users/lijolawrance/work/analytixkraft/MedhaOne && pnpm stack:up`
7. Optional when working on RBAC separately: `pnpm rbac:dev`
